## PRIVATE HIGH SCHOOLS AND ACADEMIES, 1919-20.<sup>1</sup>

The following tables present the statistics of 2,093 private high schools and academies in the continental United States and of 4 such schools in Hawaii and Porto Rico. Throughout the summary tables the totals for the United States do not include the statistics of these 4 schools in the outlying possessions. No reports from private high schools and academies were received from Nevada, Alaska, Canal Zone, or the Philippine Islands. Tables 1, 2, and 3 contain historical comparative data for five-year periods from 1890 to 1920. More detailed summary tables were given for 1900 to 1918 in the corresponding report on private high schools and academies for 1917-18. Prior to 1890 the statistics of public and private high schools were not kept separately. Tables 4 to 10, inclusive, show distributions of schools according to significant data, while Tables 11 to 19, inclusive, contain summaries of such data as could be totaled.

<sup>1</sup> This bulletin will eventually be combined with other educational reports to constitute the Biennial Survey of Education, 1918-1920. A graphic portrayal of the significant data presented in this bulletin will appear later in the Statistical Survey of Education for 1920. In this survey an attempt will also be made to interpret the diagrams and data on which they depend.
